Notes:

Post-Storm Hurricane Assessment

Post-Storm Hurricane Assessment

- ◆ FEMA and the USACE may conduct a Post-Storm Assessment (PSA) to evaluate HES products
- ◆ PSA does not evaluate a disaster plan or the performance of responders

Hurricane Isabel Assessment
 Review of Hurricane Evacuation Study Products and Other Aspects of the National Hurricane Mitigation and Preparedness Program (NHMP) in the Context of the Hurricane Isabel Response
 March 2005
 US Army Corps of Engineers FEMA

FEMA Hurricane Readiness - Coastal Communities 5-23

Visual 5-23

Notes:

PSA Process

PSA Process

Some of the items covered include:

- ◆ High water marks collection and storm surge model evaluation
- ◆ Behavioral survey and analysis to determine public response
- ◆ Transportation analysis to verify Clearance Times and other related actions
- ◆ Effectiveness of HURREVAC as a decision tool
- ◆ Effectiveness of public information products

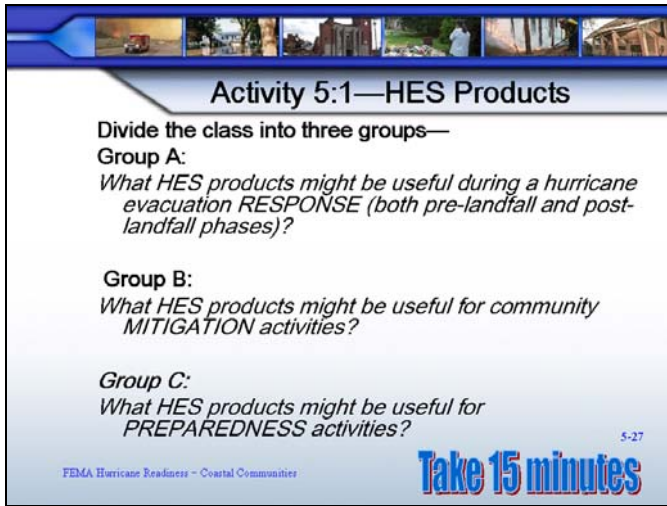

FEMA Hurricane Readiness - Coastal Communities 5-24

Notes:

Activity 5:1—Using HES Products

Notes:

Activity 5:1—HES Products

Divide the class into three groups—

Group A:
What HES products might be useful during a hurricane evacuation RESPONSE (both pre-landfall and post-landfall phases)?

Group B:
What HES products might be useful for community MITIGATION activities?

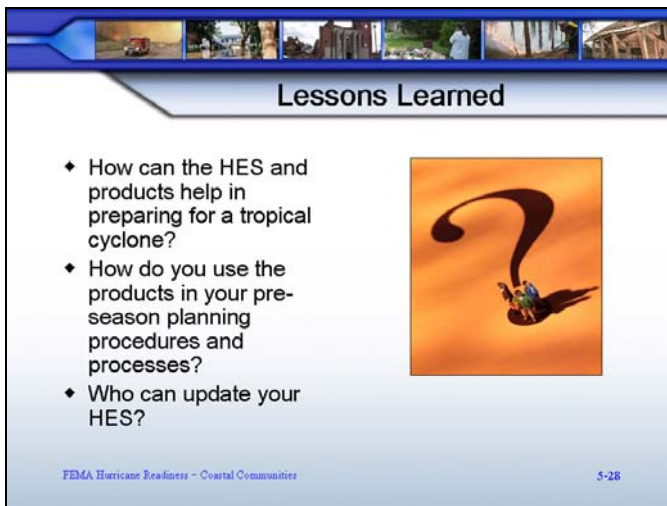

Group C:
What HES products might be useful for PREPAREDNESS activities?

FEMA Hurricane Readiness - Coastal Communities **Take 15 minutes** 5-27

Visual 5-27

Lessons Learned

Notes:

Lessons Learned

- ◆ How can the HES and products help in preparing for a tropical cyclone?
- ◆ How do you use the products in your pre-season planning procedures and processes?
- ◆ Who can update your HES?
