Questions and Answers

1. Can you please provide the electrical single lines for the existing UPS system?  
   See Amendment #2 and Amendment #3

2. Can you also provide layout drawings & general building drawings showing location of the 
   UPS system? Yes

3. Does the building have a loading dock & is there reasonable access to the system without 
   rigging? Yes  
   • Does the installation call for use of an elevator or stairs? No  
   • Does the installation call for removal of doors or other adjustments so that equipment 
     can be removed & placed? No  
   • Can we deliver the system to the site? Yes  
   • Is there temp storage for installation? Yes

4. Can you also please provide the make & model of the UPS system & battery cabinet to be 
   removed? Liebert model #NPOWER

5. Is it necessary to provide an Eaton UPS? The specs read specifically as an Eaton Spec. 
   Would it be possible to provide a UPS from other manufacturers such as Schneider, Vertiv or 
   Toshiba? MEMA would like to continue this bid award through an annual service and 
   maintenance agreement. All vendors need to provide the source/plan for maintenance and 
   service of the new UPS system. We are happy to work with out-of-state vendors, however, in 
   the case of an emergency, it is desirous of MEMA for the out-of-state vendor to have a local 
   source to provide prompt services to rectify the issue. This can be through the means of using a 
   local vendor as a sub-contractor unless the out-of-state vendor has an employee in the state 
   representing the company that can provide emergency services as well as quarterly maintenance.
